Agenda

Get started with Azure OpenAI Service

Develop apps with Azure OpenAI Service

Apply prompt engineering with Azure OpenAI Service

Generate code with Azure OpenAI Service

Generate images with Azure OpenAI Service

GenAI

What is generative AI?

Provision an Azure OpenAI resource in Azure

1. Apply for access to the Azure OpenAI service: <https://aka.ms/oaiapply>
2. Create an **Azure OpenAI** resource in the Azure portal

Provision an Azure OpenAI resource in Azure

Create Azure OpenAI ...

1 Basics ② Network ③ Tags ④ Review + submit

Enable new business solutions with OpenAI's language generation capabilities powered by GPT-3 models. These models have been pretrained with trillions of words and can easily adapt to your scenario with a few short examples provided in the inference. Apply them to numerous scenarios, from summarization to content and code generation.

Azure OpenAI Studio

- Web portal for working with Azure OpenAI models: <https://oai.azure.com/>
- View and deploy base models
- Connect your own data source
- Manage fine tuning and data files for custom models
- Test models in visual playgrounds:
 - **Chat** (GPT-3.5-Turbo and later models)
 - **Completions** (GPT-3 and earlier models)
 - **DALL-E** (Image generations)
 - **Assistants** (Custom and Copilot-like experiences)

Azure OpenAI Studio

Welcome to Azure OpenAI service

Explore the generative AI models, craft unique prompts for your use cases, and fine-tune select models.

Get started

Text generation

Assistants playground
PREVIEW
Speed up development of GPT-powered AI Assistants with prebuilt conversation state management and customization tools.
[Try it now](#)

Text generation

Bring your own data
Ground your own data on advanced AI models to create conversational copilots that aid user comprehension, task completion, and decision-making.
[Try it now](#)

Text generation

Chat playground
Design a customized AI assistant using ChatGPT. Experiment with GPT-3.5-Turbo and GPT-4 models.
[Try it now](#)

Text generation

Completions playground
Experiment with completions models for use cases such as summarization, content generation, and classification.
[Try it now](#)

Image generation

DALL-E playground
PREVIEW
Generate unique images by writing descriptions in natural language.
[Try it now](#)

Types of generative AI model

Model Family	Description
GPT-4	Newest, most capable chat-based models for language and code generation
GPT-3	Natural language and code-generation models
Embeddings	Models that use embeddings for specific tasks (similarity, text search, and code search)
DALL-E	Image-generation model (<i>preview, restricted regions</i>)

Deploying generative AI models

Deploy a model in Azure OpenAI Studio to use it

- You can deploy one or more instances of each available model
- The number of deployments depends on your quota, which you can see in the portal
- Alternatively, use the Azure CLI

Deploying generative AI models

Task	Prompt	Completion
Classifying content	Tweet: I enjoyed the training course. Sentiment:	Positive
Generating new content	Write a poem about databases	Databases, oh databases, You keep our information safe, From the small to the large, You store our data in a place.
Transformation/Translation	English: Hello French:	Bonjour
Summarization	Scotland is <i>[long description of Scotland...]</i>	Scotland is <i>[summarized description...]</i>
	Summarize the previous text	
Continuation	One way to grow tomatoes is to	start with seeds...
Question answering	How many moons does Earth have?	Earth has one moon.
Chat	<i>Setup, followed by messages...</i>	<i>A sequence of relevant responses</i>

Prompts

Testing models in Azure OpenAI Studio playground

I am actively seeking new opportunities and exciting challenges.
